

## INDUSTRIAL AUTOMATION FOR THE MEDICAL AND PHARMACEUTICAL INDUSTRIES

### IT'S IN OUR DNA

Our PureSteel® metal conveyor belts are sanitary, easy to clean and resistant to corrosion, making them the ideal solution for medical and pharmaceutical applications. They are strong, virtually non-stretchable, and maintain operation precisely and accurately.

### HYGIENE HIGHLIGHTS

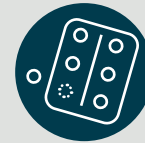

Our metal belts:

- Feature smooth, impermeable surfaces that prevent invasion of microbes or bacteria
- Have no gaps, recesses or crevices to clean
- Can be sanitized with chemical cleaning or high-pressure steam or wash
- Are cleanroom compatible and can be cleaned in place in an autoclave
- Don't outgas, emit particulates or require lubricants
- Are perfect for robotics applications; our multilayered drive tapes can handle rapid acceleration and reversing without inducing a backlash

### COUNTLESS APPLICATIONS

Home testing kits

Blister packs

Vaccines

Gel capsules

Automated pill dispensers

Robotic surgical equipment

### WIDTH

0.040"–35.4" (1–900mm)

### THICKNESS

0.002"–0.031" (0.05–0.8mm)

### CUSTOM PERFORATIONS

Up to 100,000 in a single belt
